Brand New Book ***** Print on Demand *****.Excerpt from The Laws and Mechanics of Circulation: With the Principle Involved in Animal Movement 3. The Harveian theory of the circulation, 1628, but no explanation of the portal circulation and for maintaining it in correspondence with the absorptive processes for producing a balance, otherwise impossible; no explanation of the tissue-circulation or that connected with the cell-brood, the objective point for all the commerce, the cells being the workmen in the tissues; a vaso-motor system of nerves, but not competent to explain the phenomena manifested through them; no attempt to explain the numerous muscles and nerves (unknown to Harvey) to the vessels. 4. Numerous physiological experiments upon the nerves, muscles, blood-vessels, etc., by means of which deeply interesting phenomena are developed, but their relevancy to any fundamental circumstance in the organism, or connection with one another by reason of any principle in the mechanics, not shown; illustrated by explanatory cuts showing the mode of procedure. Traube's Curves are beyond its reach; so also the blood-pressure curves and the curves of intra-thora pressure. It offers no solution...

Thorough manual for pdf lovers. I am quite late in start reading this one, but better then never. It is extremely difficult to leave it before concluding, once you begin to read the book.
